Dear Colleagues,

Some OTAQ accomplishments in 2017

VW Settlement Implementation

Along with the usual and unusual (FCA) compliance and certification workload, the light duty compliance team

has been hard at work evaluating the emissions modifications on the VW diesel vehicles that will remove defeat devices and reduce emissions. The team is ensuring that the required emissions modifications meet the specifications outlined in the settlement. Since January, the team had approved five applications and denied one, covering all but roughly 20,000 of the approximately 600,000 impacted vehicles.

Sincerely,
Chris
